

BROWNELLS UNIVERSAL REAR SIGHT ELEVATOR KIT

24 Of The Most Popular Elevators

Universal Elevator Kit contains 24 elevators, covering the most common ones you get calls for. Included are six double-step short elevators; 6 double-step long elevators; 6 standard width (.080") single-step elevators and six special narrow width (.050") singlestep elevators. Don't pass this kit up - a real money maker and lifesaver for any gun shop. 

SPECS: Length and width varies. Blued steel.

BROWNELLS DECORATIVE SLOT BLANK

Finely Crafted, Custom Pattern Looks Good On Modern & Classic Rifles

Not just another slot-filler, but an attractive, all steel blank that hides the unsightly appearance of an empty sight dovetail on your favorite sporter rifle. Stylish, diamond shape with decorative, milled edges blends naturally into the barrel contour for a truly finished look. Polished and blued with enough room for custom engraving, if so desired. Fits standard, .375" x 60° dovetails without fitting. 

SPECS: Steel, polished blue finish. 1" (2.5cm) long x 3/16" (1.4cm) wide. Fits .375" x 60° dovetail.

#080-000-193 Decorative Slot Blank, 8K16Q14 \$ 18.99

HIVIZ FIBER OPTIC RIFLE SIGHT

Eye Grabbing Dot For Fast Target Acquisition

Front sight: six, interchangeable, fiber optic rods offer a choice to match nearly all shooting and light conditions. The glowing, orange and green light pipes provide great contrast against dark target backgrounds. 

BROWNELLS SIGHT DOVETAIL SLOT BLANK

Fill Empty Dovetails For A Clean, Finished Appearance

The perfect cure when removing factory sights or restoring antiques to original space. Mild steel blanks machined slightly oversize for a close, perfectly blended fit in barrel sight dovetails. Easy to shape, file and blue. 
 SPECS: Mild steel, blued finish. 12" (30.4cm) long, fits nominal 3/8" (9.52mm) x 60° dovetails.

#080-770-375 Dovetail Slot Blanks, 8K14B44 \$ 16.99

MARBLE NO. 87 SLOT BLANK

Ready-Made To Fill Sight Dovetails

Polished blue or matte stainless steel, flat top blank fills empty sight dovetails. 

SPECS: Carbon steel, blued, polished, or stainless steel, matte finish. Fits nominal 1/2" (9.5mm), 60° dovetails. Approximately 3/8" (15.8mm) wide overall.

#579-087-100 No. 87 Dovetail Slot Blank, Blued, 9G6C74 . . . \$ 8.99

WILLIAMS ALUMINUM SLOT BLANK

Fills Empty Sight Dovetail Without Fitting

Machined, aluminum, slot blank drops-in easily to fill the empty sight dovetail for a clean-looking barrel. 5-40 set screw locks blank in place and makes removal easy. Black anodized to blend well with most blue finishes. 

SPECS: Aluminum, black anodized. 3/8" (9.5mm) x 3/8" (15.9mm). Fits standard, .375" (9.5mm) x 60° dovetails.

#962-000-034 Aluminum Slot Blank, 2F5L59 \$ 6.99

GALAZAN WINCHESTER M70/94 FRONT SIGHT HOOD

Front Blade Protection & Enhanced Sight Picture

Protects the front sight from damage caused by normal field use. Open front design allows plenty of light to reach the front blade and provide an enhanced sight picture. Spring steel construction for durability. Available for Model 94 carbine with sight ramp and pre-64 Model 70. 

SPECS: Steel, blue, matte finish. 1" (2.5cm) long x 1/2" (12.7mm) wide. Model 94 - 1/2" high (12.7mm). Model 70 - 3/8" (16.7mm) high.

#344-000-007 Model 94 Carbine w/Ramp Sight Hood, 4D7A49 \$ 9.99

#344-000-008 Pre-64 Model 70 Sight Hood, 4D7F49 9.99

BROWNELLS MAUSER FRONT SIGHT BLANK

Ready To Fit & Shape For Custom Applications; Fits The Unique, Metric Dovetail

.375" high blade lets you zero the military Mausers, like the Model 96 Swede and 98, and other rifles with a metric dovetail, to point of aim. Square post blade gives an easy-to-see, well defined sight picture with the original, issue rear sights. Plenty of extra material so you can file and shape the blade to original contour or a custom shape - and just the right height. 5.26mm dovetail fits the Mauser front sight base. Fits most Mauser 91 through 98 rifles with military sight base. 

SPECS: Steel, blued, matte finish. .077" (1.9mm) wide, .375" (9.5mm) high above 81° x .207" x .062" dovetail. May require minor fitting.

#078-050-000 Mauser Front Sight Blank, 8G11N99 . . . \$ 15.99

MARBLE SPORTING REAR SIGHT

Traditional Sights Fit Many Brands

Sporting Rear Sight Base with three styles of Uprights. Perfect as replacement sights for customizing the sight picture, or adding adjustment to fixed sight guns. Fits standard 3/8" dovetails; available with Flat Top, Semi-Buckhorn or Full Buckhorn Uprights. 

SPECS: Dovetail Model - Total heights: #63 and 64, .275" (7.1mm) - .505" (12.4mm); #63H, 64H, 66H and 67H, .350" (9.0mm) - .630 (16.0mm); #65, 66, 67 and 68, .300" (7.6mm) - .510" (12.9mm).

HIVIZ AK-47/74/AKM FIBER OPTIC FRONT SIGHT

Bright Fiber Optic For Easy Aiming

Replacement front sight post has a light-gathering fiber optic rod to produce a bright dot that's easy to acquire in a broad range of light conditions. Easily replaces the post on most AK-47, AK-74 and AKM rifle sights, no gunsmithing required. Unique, U-shaped rod gathers far more light than a standard straight rod—perfect for low-light situations. Comes with two green and two red interchangeable rods that can be changed quickly using the included tool, so you can customize the sight picture or replace a damaged rod quickly. Elevation adjustable. 

SPECS: Black steel post with 2 green and 2 red fiber optic rods. Includes detent pin, sight wrench, fiber optic rod removal tool, carrying case, and instructions.

#638-000-190 AK-47 FO Front Sight, 8C22F09 \$ 25.99

MARBLE FOLDING LEAF REAR SIGHT

Perfect "Back-Ups" For Scoped Guns

Folds down when not in use. Strong spring secures sight in "up" or "down" position. The reversible notch piece gives choice of "U" or "V" notch. Styles and heights available to fit most standard rear sight dovetails. The chart shows the overall sight height for those sights below.

69 & 69W	- Height, .370" (9.4mm) to .480" (12.2mm).
69H & 69WH	- Height, .470" (11.9mm) to .600" (15.2mm).
69WEH	- Height, .520" (13.2mm) to .640" (16.3mm).

No. 69H is .096" (2.4mm) higher than standard folding leaf. Blade & Screw replacement parts available to maintain your existing, folding-leaf sights.

FRONT SIGHT ELEVATION CORRECTION CHART

How To Use Table Below - Suppose a rifle, having a sighting radius of 24" between front sight and receiver sight, shoots 6" high at 100 yards, even with the rear sight adjusted as low as possible. Remove front sight and measure overall height, preferably with a micrometer. This might be .410", such as a Marble No. 41N. Reference to columns for 24" and 6" on table below will show a necessary correction of .040". This would mean a new, higher front sight (with an overall height of .410" plus .040" for a corrected height of .450") such as a Marble No. 45N, should be installed.

Sighting in should be done with a benchrest or prone with a sand bag or other rest for the rifle. Do not put rifle barrel or forearm directly on solid surface, but put the back of your hand or wrist on the rest and hold forearm of the rifle securely in your hand with approximately the same tightness of grip you would use when shooting at running game. If the forearm or barrel is rested directly on the sand bag or rest, the rifle will shoot higher than when held firmly while shooting at game as more "muzzle flip" will occur.

CALCULATING SIGHT HEIGHTS

Determining proper sight height is not difficult. Just remember the front and rear sights must be the same height above the center of the barrel. And, when you make your measurements, you MUST use a caliper or micrometer. A few thousandths can have a substantial effect, and this is no place for a tape measure or eyeballing!

A = Distance from centerline to top of barrel at rear sight. Barrel outside diameter divided by 2. B = Rear sight height.
C = Distance from centerline to top of barrel at front sight. Barrel outside diameter divided by 2. D = Front sight height.

Instructional video available at Brownells.com

DETERMINING FRONT SIGHT HEIGHT

When you have a rear sight and need to find the correct front sight height, the formula is $(A + B) - C = D$. With the rear sight in place:

- 1) Measure barrel diameter at the location of the rear sight and divide by 2 to get Dimension A.
- 2) If the rear sight is adjustable, set the blade in the MIDDLE of its travel. Then measure the total rear sight height from the top of the barrel, to the top of the sight blade to get Dimension B. For example, on a WGOS with a 1/4" blade, the mid-setting is .462" high, so Dimension B would be .462".
- 3) Measure the barrel diameter at the projected location of the front sight and divide by 2 to get Dimension C.
- 4) Add Dimension A + Dimension B, then subtract Dimension C from the total to get Dimension D, the required height of the front sight above the top of the barrel.
- 5) Choose the tallest ramp and shortest sight blade combination that's closest to the results in Step 4. In the example below, the required front sight height is .587". A Williams 3/8" (.282" high) ramp and a Marble #31MR sight (.312" high) will provide a combined height of .594". Or combine a Williams .250" high

blade with a Williams 3/16" (.3445") ramp for a total height of .5945".

DETERMINING REAR SIGHT HEIGHT

When you have a front sight and need to find the correct rear sight height, the formula is $(C + D) - A = B$. With the front sight in place:

- 1) Measure barrel diameter at the projected rear sight location and divide by 2 to get Dimension A.
- 2) Measure the barrel diameter at the location of the front sight and divide by 2 to get Dimension C.
- 3) Measure the front sight height from the top of the barrel to the top of the sight blade to get Dimension D.
- 4) Add Dimension C + Dimension D, then subtract Dimension A from the total to get Dimension B, the required height of the rear sight above the top of the barrel.
- 5) Choose a rear base and sight combination with a total height closest to D. If the rear sight is adjustable, the total height should match Dimension D when the sight is positioned in the MIDDLE of the adjustment area.

EXAMPLE WITH NUMBERS

FRONT SIGHT CALCULATION:	REAR SIGHT CALCULATION:
$(A + B) - C = D$	$(C + D) - A = B$
$(.475 + .462) - .350 = .587$	$(.350 + .587) - .475 = .462$
$.937 - .350 = .587"$	$.937 - .475 = .462"$

MARBLE BULLSEYE REAR SIGHT

For Fast Target Acquisition & Improved Accuracy

Barrel-mounted, dovetail Bullseye sight gets you on target fast with perfect alignment for improved accuracy. Steel, double-ring peep design ensures consistent sight alignment and helps improve shooting form. The moment the rear sight is misaligned, the front sight drifts out of the center ring, telling the shooter to re-align. Replaces standard 3/8" dovetail rear sights on many rifles. For use with bead-type or traditional blade front sights. **Adjustable** models are available with a short or long base and six-position step elevator that's adjustable in .030" increments for precise elevation settings. **Fixed** model features the same Bullseye peep design but without the extended base and is not elevation adjustable. All models are drift adjustable for windage. May require minor fitting. **SPECS:** Steel, blue, polished finish. Fits nominal 1/8" (9.5mm) dovetail. Outside Ring O.D. - 3/8" (1.4cm). Inside Ring I.D. - .15" (3.8mm). **Adjustable** - .338"-.535" (8.6mm - 13.5mm) elevation adjustment in six .030" (.76mm) increments. OAL from rear of dovetail - Long: 2 1/2" (6.3cm). Short - 1 1/2" (3.8cm). **Fixed** - .438" (11.1mm) fixed height from bottom of dovetail to center of inside ring. 7/16" (11mm) long.

MARBLE #95 FOLDING SPORTING REAR SIGHT

Traditional Appearance; Folds Down For Storage Or Carry

Folding design helps prevent accidental damage to the rear leaf. Leaf easily flips down, out of the way, when your favorite lever or single-shot rifle is stored or carried. Long shank, barrel-mounted sight is fully adjustable using the center plate and center plate lock screw—no need for a separate elevator. Flat top leaf with white diamond sight insert helps improve sight acquisition and alignment. Screw and drift adjustable for windage. Fits nominal 3/8" dovetail. May require minor fitting. **SPECS:** Steel, blue, polished finish. Leaf - .300" (7.8mm) high, .630" (15.8mm) wide. Fits nominal 3/8" (9.5mm) dovetail.

SAMSON MFG. RUGER® 10/22® B-TM SIGHT SET

Iron Sight Upgrade Enables a More Comfortable "Head-Up" Stance Plus Rail Section for Mounting a Red Dot

Got a Samson B-TM folding stock on your 10/22? Congratulations! It's a great upgrade to an already great rimfire rifle. But... some folks would really like a higher sight picture so they can maintain a more comfortable cheekweld on the B-TM. If you're one of these folks - or if you just want to get better "iron" sights and/or mount a red dot on your 10/22 - Samson's B-TM Sight set is a must-have. Compared to the 0.7" height over bore of 10/22 fac'tree iron sights, Samson's elevated sights have a 1.25" height over bore that allow for a much more comfortable and natural "head up" cheekweld. Rear sight mounts to the factory drilled-and-tapped scope mount holes in the receiver. Samson's rear aperture is adjustable for windage, and your final setting, not to mention the peep itself, is guarded by a sturdy set of protective shoulders. Even better, the rear sight assembly includes a machined 6" Picatinny rail section that lets you mount a red dot optic to co-witness with the iron sights. The front sight post is fully adjustable for elevation, while a pair of "ears" flanking the post protect it from bumps, dings, and unintended impact with stuff. It mounts to the factory front sight dovetail, so a dovetailed barrel IS required for installation; will not fit rifles without factory iron sights. By the way, the front and rear sights are designed to mimic the look of the Mini-14® factory iron sights. Front and rear sight assemblies are machined aluminum with a tough matte black hardcoat anodized finish. Package includes sight adjustment tool, mounting hardware, and 3/16" hex wrench.

#100-047-442 B-TM Sight Set for 10/22®, 5K80B99 ... \$ 85.45

SMITH ENTERPRISE M1/M14/M1A FRONT & REAR SIGHTS

M1 Garand Front Sight

For Easy Restorations Or Competition

Heat-treated, 4130 chrome moly front and rear sights make it fast and easy to upgrade your original military sights for improved strength and accuracy.

Parkerized finish reduces glare and helps deflect light for a clear, easy-to-acquire sight picture in all light conditions. Match-type front sights feature a narrow, .062" wide front blade for a crisp, clear sight picture at all normal competition ranges.

SPECS: Steel, Parkerized finish. .062" (1.6mm) wide blade. Includes setscrew.

TECH SIGHTS RUGER 10/22 GI-STYLE APERTURE SIGHTS

Provides Familiar M16 Service Rifle Sight Picture & Improved Accuracy

Replacement sight sets give you 10/22 a longer sight radius for improved accuracy potential, plus the same sight picture as an AR-15/M16 with military-issue sights. Installation requires no gunsmithing, no drilling/tapping, and no permanent alterations to the rifle. Rear sight mounts using the factory-provided holes for a scope base. All-steel front sight assembly has a standard detent-locking M16 post surrounded by protective ears that guard it from damage and misalignment. User may substitute any aftermarket post that replaces the standard A2. **TSR100** set's rear sight is adjustable for windage and features close-range and long-range flip-up apertures similar to the M16A2 sight. For even greater precision, the **TSR200** set's rear sight has a single aperture that uses a rotating dial for fine adjustments in elevation; click adjustable for windage. **SPECS:** Front Sight - steel, blued, matte finish, .53" (13.4mm) wide, .90" (23mm) high. Rear Sight - aluminum, black finish. 2.9" (7.4cm) long, .94" (24mm) tall. Sold as front/rear sight sets.

- #962-201-606 Foolproof FP-GR-TK, 2F72J24 84.99

WILLIAMS RIFLE FIRE SIGHT

Glowing, Fiber Optic Dots For Faster Sight Pickup

Easy-to-install front sights for popular centerfire and muzzleloading rifles gather ambient light for superb visibility. The more light, the brighter the round, red beads glow; won't "wash out" even in the strongest sunlight. Narrow sights fit Williams Streamlined and Shorty Rams. Medium sights fit most factory ramps including Marlin and Remington. Wide sights are for .22 rimfire rifles and muzzleloaders. **SPECS:** Blue steel. Fiber optic insert. Beads: 1/16" (1.6mm) dia. Fit nominal 3/8" dovetail. Number indicates height, letter (N, M or W) indicates base width. Height is measured from bottom of dovetail to top of sight. N Series - .250" (6.3mm) wide base. M Series - .340" (8.6mm) wide base. W Series - .531" (13.5mm) wide base.

WILLIAMS BLADES & BASES FOR "WGOS" & "WDOS" SIGHTS

Assemble Complete Sights Or Replace Blades To Change Sight Picture

U-Notch Sq.-Notch

Precision-made sight bases and blades milled from high-tensile strength, rustproof alloy. Dovetailed windage and elevation adjustments have hardened gib locks. Make adjustments quickly by loosening one screw. No dovetailing of barrel necessary. Bases and blades sold separately. Blades can also replace the aperture on WGRS sights.

SPECS: Bases and blades: aluminum, black anodized finish. Bases - All models except the **One Inch** have .5625" c-to-c hole spacing. **Small** - .347" radius, fits .660" to .730" dia. barrels. **Medium** - .395" radius, fits .730" to .830" dia. barrels. **Large** - .440" radius, fits .830" to .930" dia. barrels. **X-Large** - .5625" c-to-c hole spacing. **475"** radius, fits .900" to 1" dia. barrels. **One Inch** - 1" c-to-c hole spacing, .500" radius, fits 1" dia. barrels. **26mm** - .550" radius, fits 1" to 1.1" dia. barrels. **Blades available in 1/16"** (4.8mm), 1/4" (6.3mm), 3/16" (7.9mm), and 1/8" (9.5mm) heights. Range of adjustment for each listed in table below.

ONE-PIECE FIRE SIGHT RAMP

Replaces Fragile, Plastic Ramps With Sturdy, One-Piece Metal

No need to worry about breaking a sight ramp when you're busting through heavy brush. Solid, one-piece, CNC machined aluminum ramp attaches with one 6-48 screw and gives you a bright, glowing, sight picture. Fire red, fiber optic rod glows brightly using only available natural light for high visibility.

SPECS: CNC machined aluminum, black. Fire red fiber optic rod. #70105 - height = .410", fits barrel dia. of .625"; #70220 - height = .485", fits barrel dia. of .875". Gunsmith installation recommended.

#962-000-065 #70105 Fire Sight Ramp, 2F16I14 \$18.99
 #962-000-066 #70220 Fire Sight Ramp, 2F16A14 18.99

WILLIAMS

REAR DOVETAIL FIRESIGHT

Replaces 3/8" Dovetail Rear Sights With Fiber Optics

Highly visible fiber optic rear sight fits lever actions, .22 rimfires, and most American-made rifles with the standard 3/8" dovetail. Bright green dots are easily seen under most light conditions and help you get on target quickly. Adjustable for windage and elevation. No gunsmithing required.

SPECS: Aluminum, matte black. Green fiber optic rod. Approximately 1/16" from bottom of blade to bottom of notch. Fits 3/8" dovetails.

#962-000-098 Dovetail Rear Firesight, 2F16G14 \$18.99

WILLIAMS

RIFLE FIRE SIGHTS

Upgrade Your Factory Sights With Easy-To-See, Fiber Optics

All sets feature a bright red, fiber optic, front sight and fully adjustable peep or U-notch, rear sight. U-notch, rear sight sets use the highly accurate, 3-dot pattern with two green, fiber optic dots at the rear for sharp contrast and quick sight acquisition in all light conditions. No drilling or tapping required for most rifle models. Dovetailed front and rear sights may require minor fitting.

REMINGTON FIRE SIGHTS - Fiber optic, U-notch, rear sight attaches to the factory, rear sight ramp to improve visibility; adjusts for windage and elevation. Contrasting, red, front sight really stands out for fast pickup and alignment. **2003 & Earlier** fits Remington rifles and muzzleloaders with dovetailed, front sight ramps, plus all Remington shotguns. **2003 & Later** fits Remington rifles and muzzleloaders manufactured from 2003 to present with 1-piece, ramped front sights.

SPECS: Aluminum, black anodized.

#962-565-300 Remington Fire Sights, 2F24A64 \$28.99
 #962-000-056 2003 & Later Rem. Fire Sights, 2F24J64 28.99

REMINGTON GHOST RING FIRE SIGHTS - Bright, high contrast fiber optic sights with large aperture, rear ghost ring provide fast, accurate sight alignment in all light conditions. The more light, the brighter the beads glow. Front sight has a single red insert, rear ghost ring has two green inserts to form an easy-to-align, 3-dot sight picture. Fits Remington rifles and muzzleloaders from **2003 and earlier** with 3/8" dovetail front sight ramps, plus all Remington shotguns with 3/8" dovetail front sight ramps. Set includes front and rear sights.

SPECS: Steel front 3/8" dovetail sight. Aluminum rear sight. Black, matte finish. Fiber optic insert. Bead - 1/16" (1.6mm) dia. Ghost Ring - .15" (3.8mm) dia. aperture.

#962-000-083 2003 & Earlier Ghost Ring Fire Sights, 2F31N44 \$36.99

RUGER® 10/22® FIRE SIGHTS - High visibility, fast to pickup, sight systems for the Ruger® 10/22®. **WGRS** features low profile, guide receiver, peep sight and red, fiber optic, front sight. **3-Dot** has U-notch rear blade with green dots, red front sight. Adjustable for windage and elevation.

SPECS: Aluminum, black anodized. Front - .530" high, 1/16" red fiber optic bead. Fits Ruger 10/22 only.

#962-633-300 WGRS-RU22 Fire Sights, 2F40F79 \$47.99
 #962-602-130 3-Dot Ruger Fire Sights, 2F20B39 23.99

MARLIN & WINCHESTER LEVER ACTION - For Marlin and Winchester lever action rifles. Replaces factory front and rear sights. Rear sight is screw adjustable for elevation and drift adjustable for windage; has two, green, fiber optic dots. Front has red, fiber optic rod.

SPECS: Aluminum, black anodized. Fits all Winchester and Marlin lever actions with ramped front sights.

#962-602-170 Dovetail Fire Sights, 2F33C14 \$38.99

MARLIN RIMFIRE FIRE SIGHTS - Dovetail sights replace the factory open sight sets on your Marlin rimfire. U-shaped, green, fiber

WILLIAMS

MUZZLELOADER FIRE SIGHT

Fast, Accurate Sighting For All Light Conditions

Contrasting red front and green rear, fiber optic dots offer quick sight alignment; won't wash out in bright light, improve contrast in low light. Fully adjustable, "U"-notch, rear sight gives precise alignment for long range shots. Replaces factory sights with only minor fitting. Machined from aircraft aluminum for years of service.

SPECS: Aluminum body, black, matte finish. Bead - .058" (1.2mm) diameter, .89" (22.6mm) long. TC - Thompson Center. Octagon model fits newer guns with .836", c-to-c hole spacing. Remington sets are available with a standard notch rear sight or a .15" (3.8mm) diameter ghost ring rear sight. Models to fit **2003 & Earlier** muzzleloaders with 3/8" dovetail front sight ramps or **2003 & Later** muzzleloaders with 1-piece ramped front sights.

GUARANTEED. FOREVER. SINCE 1939

WILLIAMS FOOLPROOF & 5D RECEIVER SIGHTS

Dependable, Accurate Sights - Available For Most Guns

FOOLPROOF RECEIVER SIGHTS - Internal micrometer adjustments lock positively to prevent accidental movement of sight setting. No obstructions to impair and blot out shooter's field of vision. Weighs only 1 1/2 oz. Standard hole spacing to fit guns factory drilled and tapped for receiver sight. **Foolproof** features adjustment screws for windage and elevation.

Foolproof-TK comes equipped with target knobs.

SPECS: Alum., black, anodized. Steel screws. See chart below.

— Advise # — 5-D Sight, 2F35M69 \$ 41.99

— Advise # — Foolproof Sight, 2F63C74 74.99

- #962-157-520 Target Windage Knob, Long, 2F00CNM... \$ 6.99
- #962-157-530 Target Windage Knob, Short, 2F00HJN... 6.99
- #962-157-240 Target Elev. Knob, Long, 2F00FAL 7.99
- #962-157-250 Target Elev. Knob, Short, 2F00LUL 7.99
- #962-000-079 Elevation Gib Lock Knob, 2F00KQM 7.99

5D RECEIVER SIGHT - Same dependable, accurate construction as the Foolproof models but without micrometer adjustments. Windage and elevation adjustments are easily made by loosening screws, moving the sight, and re-tightening the screws. Excellent for hunting rifle applications that don't require regular tweaking of the sight adjustment settings. Stop screw provides an accurate guide, so the 5D sight will return to absolute zero upon detaching and reattaching to the gun. Standard hole spacing for easy, secure mounting.

SPECS: Aluminum, black, anodized. Steel screws. Advise Stock # from chart below.

— Advise # — 5-D Sight, 2F35M69 \$ 41.99

FOOLPROOF TARGET KNOBS - All Foolproof sights (except TK models) use the Short Elevation Knob. The Long Elevation Knob is for use with Foolproof-TK target sights. † indicates Short Windage Knob, †† indicates Long Windage knob. The Elevation Gib Lock Knob fits both standard Foolproof and Foolproof-TK models.

MARLIN 1894/1895/336/308MX LEVER RAIL - Lightweight scope rail mounts to Marlin centerfire lever gun without drilling and trapping. Accepts Weaver-style or Picatinny accessories, including the Marlin 1894, 1895 or Marlin 336/308MX Lever Rail Ghost Ring set (above). Extra-long rail gives plenty of versatility in mounting scope directly over the receiver or forward over the barrel for intermediate eye relief optics or red dot sights. Requires removal of factory rear sight. Gunsmith installation recommended.

SPECS: Aluminum, black, matte finish. 11" (27cm) long. .830" (21mm)

XS SIGHT SYSTEMS AK-47 TRITONIUM EXPRESS SIGHT SET

Big Dot Front Sight Puts You On Target Fast; Fully Adjustable Rear Sight For Improved Accuracy

High visibility sight combination easily replaces the factory sights on your AK-47 or variant for fast sight acquisition in high stress or low light conditions. Machined steel set includes an adjustable white stripe, V-notch rear sight and a genuine Trijicon brand tritium lamp with large white ring for the front. Front sight completely replaces the factory windage drum and front sight post. Large, single setscrew in the tangent rear sight provides fine adjustments for elevation; dual setscrews in the dovetailed rear V-notch block securely lock-in your windage settings. Includes installation tools, thread locking agent, and detailed instructions.

SPECS: Steel, black, matte finish. Front Sight - .160" (4.1mm) diameter white ring with .075" (1.9mm) diameter tritium lamp. Rear Sight - .140" (3.6mm) high vertical white stripe. Fits AK-47 and clones.

MARBLE IMPROVED PEEP TANG SIGHT

Interchangeable Posts For Quick Change From Short- To Long-Range Configuration

Gives the single-shot or lever gun shooter the period looks of a traditional tang-mounted peep sight, plus new adjustability features that allow fast changes from short- to long-range settings. Great for the cowboy shooter who

wants to use the same gun in cowboy competition and long-range side matches, or as an alternative to vernier-type sights on single-shot rifles used in BPCR and other long-range competitions. Each sight comes with a post that is the correct height to regulate the same as the original factory iron sights. Click adjustable for windage and elevation; each click is approximately 1/16" of adjustment at 100 yards. For larger elevation changes, you can easily swap in a higher or lower post (available below); choose a lower post for close-in shooting and a taller post for longer ranges. All components are precision CNC machined from 4140 steel, with critical parts heat-treated for extra strength. To purchase, find your gun in the left column, then find the correct sight kit and mounting screw set for it in the right column. Use with Marble's front sights, available separately. **SPECS:** Steel, blued. Drilling and tapping may be required for installation on older guns. Sight kit includes base, Low (L) or Standard (S) height post, 1/2" O.D. aperture disc with .055" peep, and Allen wrench.

- Advise # — Mounting Screw Set For Marble Tang Sight, 9G6L39 7.99

SIGHT POSTS - The Improved Tang Sight's quick-release post system makes it easy to replace the post that came with your sight with a higher or lower one for targeting at different ranges. Choose a lower post for close-in targets or a taller post for longer ranges. Post height is also click adjustable for fine-tuning when sighting in; each click represents 1/16" of adjustment at 100 yards. A jam nut locks the elevation, so you can remove and reinstall a post without losing settings.

SPECS: Steel, blued. Heights measured from base of post to center of aperture. **Low** - 1.085" to 1.415" height adjustment range. 1/16" aperture disc with .055" peep. **Standard** - 1.341" to 1.876" height adjustment range. **Medium** - 1.875" to 2.965" height adjustment range. 1/16" aperture disc with .032" peep.

MARBLE TANG SIGHT

Period Looks, Superb Accuracy

Adds a touch of authenticity to pump and lever action rifles, whether they're used for hunting or Cowboy Action Shooting. Provides better sight definition and faster target acquisition in the field or on the range. Locates the aperture closer to the eye for a clear sight picture; longer sight radius increases accuracy. All steel construction with micrometer adjustments for windage and elevation. Folds to the rear for storage. Mounting screw set must be purchased separately. **SPECS:** Steel, blued. Older guns may require drilling and tapping. Includes (2) 1/2" diameter apertures: .055" (1.4mm) and .102" (2.6mm) size holes, and (1) 1/2" diameter aperture with .032" (.81mm) hole. Savage 99 will not fit late rifles with top safety. Late rifles with safety at trigger will require drilling and tapping. Mounting screw sets sold separately.

LYMAN NO. 2 TANG SIGHT

The Original No. 2; Now Back In Production

The original folding tang sight that increases sight radius for greater potential accuracy with your favorite lever action rifle. Sight features rugged, all-steel construction, knurled locking screw, index marks on aperture post, .093" quick sight and .040" large disc apertures. Includes rear stock screw and front tang screw. **SPECS:** Steel, blue. C-to-c 2.200"; fits Winchester Model 94. Some rifles may require drilling and tapping. Can be adapted to other rifles with tangs. #539-050-002 Winchester 94 No. 2 Tang Sight, 5K84M99 \$94.99

MIDWEST INDUSTRIES MARLIN 1894/1895 GHOST RING RAIL SIGHT SETS

Vastly Improves the Targeting Speed AND Precision of Your 21st Century Tactical Lever Gun

Ya know, pardner.... lever action rifles were the "Black Rifle" of their era, the latest in "tactical" and personal defense firearm technology. And even now, more than a century and a half since the Henry Repeating Rifle revolutionized the Personal Defense Weapon landscape, the lever action rifle can STILL be a formidable weapon. Hence, MI's line of tactical upgrades for them, including these sight rails for the venerable Marlin '94 and 1895 rifles. This kit includes matched front and ghost-ring rear iron sights - still one of the fastest-to-acquire sight pictures. That rear sight clamps securely on top of an assembly that includes 2.5" (1894) or 4" (1895) of MIL-STD 1913 Picatinny rail, so you can further boost your Marlin into Buck Rogers territory by mounting a red dot sight on it. If your red dot of choice is an Aimpoint T1 or T2, you can get Midwest's "T1" rear rail assembly with a built-in mount for it instead of the Pic rail. The ghost-ring setup includes a wide windage and elevation adjustment range so you can quickly re-zero the rifle when you change to a different ammo load (sight adjustment tool included). The rear base assembly is made of 6061 T6 aluminum with a matte black hardcoat anodized finish, while the front sight and rear sight ghost ring are black-finished steel.

- #100-043-863 Marlin 1895 T1 Ghost Ring Sight Set, 2A114A29 124.95

SMITH ENTERPRISE WESSON & HARRINGTON LONG RANGE SIGHT

Extremely Versatile Buckhorn Sight; Sight, Base & Screws, All-In-One

Precision-machined, buckhorn, rear sight and base include screws that fit the holes in your Wesson & Harrington rifle for drop-on, no gunsmithing installation. Slider has a detent that lets you feel each adjustment; setscrew locks into place. Ladder has side markings so you can easily repeat the right yardage settings. Drift adjustable for windage; setscrew locks your setting. **SPECS:** Machined steel, blued finish. Sight - Ladder has approximately 1 7/16" (3.6cm) height adjustment; Buckhorn aperture 3/16" (8mm) I.D. Base - 3/16" (7.5mm) high from bottom of receiver to top of base, 2 1/4" (7cm) long, 3/16" (15.9mm) wide.

GUARANTEED. FOREVER. SINCE 1939

PEDERSOLI

COWBOY TARGET RIFLE SIGHTS

Superb Long-Range Accuracy & The Right Period Styling

Single-shot rifles of the Old West are capable of tremendous range and accuracy, but fixed, factory sights rarely allow these guns to reach their full potential. In the days before compact scopes, target shooters and hunters seeking tack-driving accuracy relied on precisely adjustable vernier tang-mounted rear sights and globe front sights. Pedersoli offers BPCR silhouette shooters, competitors, and Cowboy Action shooters taking part in Schuetzen side matches affordable, high-quality replica sights that function just like the originals. Get your Winchester 1885, Rolling Block, Sharps, Ballard, Trapdoor Springfield, or other vintage single-shot rifle performing—and looking—its best.

"CREEDMOOR" REAR TANG SIGHTS

Named after the famous range on Long Island that hosted many long-range rifle competitions in the 1870s and '80s, the Creedmoor ladder-type sight is fully adjustable for windage and elevation and works equally well on cartridge rifles and muzzleloaders. Sight is precision machined from steel and attaches to tang with supplied setscrews and folds down when not in use. The **Universal** model is available in middle-range 2" and long-range 3" heights. The windage adjustment mechanism is on the eyepiece, allowing the eyepiece to be dropped close to the base for close-in shots. The **Soule** model provides maximum adjustability to fit any hunting or target shooting conditions. Elevation is adjustable in precise increments of 1 MOA, and one full turn of the windage knob moves the point of aim left or right by 2 1/2 MOA in 1/2 minute increments. Large knurled knob at the sight base allows fast, accurate return to center or previous setting. **Goodwin Style** sights offer precise windage adjustments with 1.26" movement for high wind conditions. Elevation adjustment totals 3.94" for long-range shooting and the tilt screw on the base lets you keep the sight perfectly vertical, no matter the elevation or angle. Goodwin-Style structure lets you reach the rifle's chamber with any cleaning device and inspect the barrel between shots.

SPECS: Steel, blued. Elongated rear mounting hole allows installation on most rifles. Drilling and tapping of tang may be required. Distance between mounting holes 2.20"-2.29" (5.6-5.8cm). Mounting screws and installation instructions included.

SPIRIT LEVEL TUNNEL FRONT SIGHT W/INSERTS

Windage-adjustable, tunnel front sight comes with 12 interchangeable inserts so you can choose the sight picture that's best for the distance and range of your target. The spirit level helps you hold the rifle completely upright to eliminate inaccuracies caused by tilting to the left or right. Perfect companion for the Creedmoor Rear Sights.

SPECS: Steel, blued. 1" (2.8cm) OAL, 1 1/2" (3.6cm) maximum width at adjustment knobs. Fits 3/8" (9.5mm), 60° dovetail. Instructions included.

SMITH ENTERPRISE M-95 LONG RANGE SIGHT

Authentic Cowboy Action Look; Great For Long Distance Shooting

Versatile, CNC-machined, steel sight lets you shoot both long and short distances. Flipped up, the ladder adjusts from 100-1100 yards; flipped down, the flat top, V sight provides fast target acquisition for short shots. Ball detents provide an audible and felt click for each graduation on the ladder. Fits rifles with a 3/8" dovetail.

SPECS: Steel, black oxide finish. 2 1/8" (5.4cm) long. Ladder provides 1 1/2" (3.4cm) height adjustment. Fits rifles with a 3/8" (9.5mm) dovetail.

- #851-000-046 M-95 Long Range Sight, 1E147M89..... \$ 173.99

MARBLE TRITIUM SHOTGUN SIGHT

Gets You On Target Quickly In Low & Regular Light

Machined steel sight has an eye-catching Tritium insert to provide a fast sight picture in low light and an easy-to-acquire white ring for daylight. White ring is recessed to protect it from being scratched and to ensure proper light reflection from any angle.

SPECS: Steel, blued, matte finish. Approximately .32" (8.1mm) long, 3/16" (4.8mm) wide, .21" (5.4mm) high. 3/32" (2.4mm) shank length. See price line for thread diameter.

TRUGLO

GLO-DOT XTREME SHOTGUN SIGHT

High-Visibility Glowing Dot Makes the Most of Ambient Light

Light-gathering fiber-optic rod presents a bright, glowing aiming dot for better visibility in both bright and low light hunting conditions. Comes with four dif-

ferent magnetic bases with different internal mounting dimensions that fit a variety of ventilated ribs. Polymer base snaps onto the rib and is held firmly in place with a high-strength magnet for quick installation without screws. (May also be installed by drilling and tapping rib, screws not included.) Does not require front bead removal. Includes one red, green, yellow, and amber fiber optic rod. Rods are easily interchanged using thumb and finger pressure. Notch in base uses factory bead to locate sight correctly along bore axis. Two sets of magnets allow mounting sights on two shotguns with different width ventilated ribs. Includes pocket sized, steel case for convenient storage. Universal fit for all shotguns equipped with 1/4" (6.4mm), 3/8" (7.9mm), 1/2" (9.5mm), or 5/8" (12.7mm) wide ventilated ribs. Includes one base of each size.

SPECS: Universal fit for all shotguns equipped with 1/4" (6.4mm), 3/8" (7.9mm), 1/2" (9.5mm), or 5/8" (12.7mm) wide ventilated ribs. Bases - Plastic, black. (1) .260" (6.5mm), (1) .330" (8.4mm), (1) .420" (10.7mm), (1) .520" (13.2mm) internal dimension. 2" (5.1cm) long. Rods - Polymer, (1) red, (1) green, (1) yellow, (1) amber. 1 1/2" (2cm) long x .060" (1.5mm) dia. Includes (2) sets of magnets & steel carry case.

SHOTGUN SIGHT KIT "B"

Brownells Shotgun Sight Kit "A" is a practical, economical assortment of top-quality, replacement shotgun sights. The workmanship is superb, being done on the most modern and up-to-date machinery in the U.S.A. The sight globes are true spheres - not lop-sided as those found on many other sights at a higher price. The threads are cut onto the shank, and are clean, sharp and well-machined for the best possible fit. Shanks are threaded right up to the base of the bead so you can set the sight exactly onto the barrel.

Your choice of sights in the Kit is extremely wide. There are 2 shank sizes, 3 bead sizes and 2 bead colors, giving you a total of 8 different sights to choose from so you can fit nearly any gun that comes into the shop.

The two shank sizes are **3-56** and **6-48**. Size 3-56 is one of the most widely used shanks in the industry and will fit most guns having threaded sight holes. The 6-48 shaft was chosen for the alternate size to be used when the original hole must be redrilled and tapped - or where there is no hole at all - because 6-48 is the firearm industry standard screw size, and every gunshop in the country will have the drill and tap on hand to make the new hole.

Bead sizes are **.067**, **.130** and **.175**, (the most popular sizes), giving your customer the choice of small, medium or large beads. In addition, each bead size is available in **Gold** color - machined from finest brass; or **White** color - machined from high tensile aluminum alloy. Neither color will bleed at the heels, wear off with hard use, or chip and peel, as almost all enameled sights eventually do.

Brownells Shotgun Sight Kit "A" comes to you very attractively displayed in a clear plastic counter case. Each individual sight number is in its own plainly identified box on a black tray. There are 10 sights of each number, giving you a total of 80 sights in the Kit - 40 Gold and 40 White - a complete inventory of top-quality shotgun sights with an absolute minimum of capital invested.

Don't pass up the opportunity to cash-in on the shotgun sight replacement market. For an unbelievably low investment you can have a complete, correctly balanced and assorted inventory of 80 superb shotgun sights, each carrying Brownells guarantee of perfect workmanship and materials. Don't let yourself get caught short when you can have them on hand so easily. Order your Brownells Shotgun Sight Kit "A" today!

SPECS: Brass and Aluminum Beads in 3 1/2" (8.9cm) x 7" (17.8cm) clear plastic box.

Brownells Shotgun Sight Kit "B" is truly the natural and logical companion to the original Kit "A" - giving you all the sights that Kit "A" doesn't contain, but that you need to have for a really versatile and complete replacement shotgun sight inventory. Plus, in Kit "B," we took the practical step of making the White beads out of stainless steel. Stainless is stronger, won't crush or distort when the beads are installed, does not have to be removed when the gun goes into the hot bluing solution (and won't dissolve and ruin your bluing bath once it's in there!!) Plus, the stainless won't break off at the top of the shank, stays shiny forever, stands up to tougher use in the field, and generally a lot better sight.

But, the real advantage of Kit "B" is that by combining it with Kit "A", you can now have a selection of shank sizes unequalled among shotgun sights. So, if you get a gun in your shop with a badly misshapen, worn or stripped-out sight hole, you will have a bead of exactly the same size, but with a shank one size larger. Replacement is then just a simple matter of drilling out the hole to the next size larger, tapping, and inserting the new bead.

The most important thing is that the Kit saves you time, giving faster work turnaround in the shop, which makes you more money. It also eliminates "patching-up" the original hole (which often then requires repairing the blue, too) and redrilling and tapping for the original size shank. And, it gets your customer back in the field sooner which makes him happy, and makes you look good! Like the original Kit "A", the workmanship is superb, the sight globes are true spheres, the threads are cut onto the shank, so they are clean, sharp, and give the best possible fit. And, they are threaded right up to the base of the bead so you can set the sight exactly onto the barrel.

Thread sizes are **6-48** and **8-40** - two of the most common and popular thread sizes in the gun industry, so everyone has the necessary drills and taps. The bead sizes are **.067**, **.130** and **.175**, again the most popular sizes, and the same as those used in Kit "A".

The **Gold** beads are machined from finest brass; the **White** beads from tough stainless steel. Because these are solid metal beads, they cannot bleed, chip, peel or have the color wear off.

As the companion to Kit "A", Kit "B" also comes in a clear plastic counter case. Each individual sight number is in its own clearly identified box on a black tray. There are **10 sights of each number**, giving you a **total of 80 new sights**. By itself, a complete inventory of 3 very popular sizes in 2 colors, with 6-48 and 8-40 shanks; but as a companion to Kit "A", an unbeatable assortment of the most versatile and useful shotgun sight beads available anywhere. And, right at your fingertips, ready to install for your customers. Order your Brownells Shotgun Sight Kit "B" today.

SPECS: Brass and Stainless Steel Beads in 3 1/2" (8.9cm) x 7" (17.9cm) clear plastic box.

Brownells Shotgun Sight Kit "C" is a must have for any gunsmith or sporting goods store looking to save valuable time and really please their customers. We have taken everything that's great about our Shotgun Sight Kits "A" and "B" - like their unparalleled selection of high quality and size- popular sight beads- and added a special feature to make the beads in Kit "C" fast, easy, and convenient to install... every-time. Every sight bead in Shotgun Sight Kit "C" has the advantage of skirted shoulders. What this means to you, the professional gunsmith or the sporting goods store owner, is you'll never have to get out your mike or calipers again to ensure you've installed the sight to its proper height. No more guesswork either! Because when the skirted shoulder reaches the barrel, it provides a positive stop that lets you know the sight is at its optimum height. Every sight from Shotgun Sight Kit "C" installs with fool-proof ease - saving you both valuable shop time and, even more important, the nightmare of upsetting a valuable customer. Not only will customers be pleased with the installation you do, they'll also love the huge selection of sizes and styles from which to choose. We selected the most popular sizes from our Shotgun Sight Kits "A" and "B", because we know that's what your customers will come in and ask you for. Plus, we know how important it is to offer different styles to please as many shooters as possible. That's why Kit "C" offers each size bead in both **Gold** and **White**. It provides the perfect selection; **Gold** brass for a classy, traditional look many shotgun owners are partial to and **White** stainless steel for a sight bead so strong it even stands up to hot bluing. Thread sizes include **3-56** and **6-48** with bead diameters of **.067"**, **.130"**, and **.175"** to give your customers the choice of small, medium and large beads. Also, for easy storage and quick identification, we've followed the same, convenient layout of Kits "A" and "B" to make it as simple as possible to find the sight you need. Kit "C's" plastic counter case is divided into eight compartments to keep the beads organized and right at your fingertips. Plus, if you put this great-looking kit on your counter for your customers to see, it's a great way to create more business by reminding people to replace broken or damaged sight beads. Brownells Shotgun Sight Kit "C" is everything you've been looking for; a huge selection, superb quality, and now the convenience of skirted shoulders. Order this time-saving, customer pleasing kit today and enjoy the speed, precision, and ease with which each of these sights installs.

HIVIZ SHOTGUN FIBER OPTIC SIGHT

Improves Target Visualization

Light gathering polymer rod works in low light, as well as bright daylight, to give you an easy-to-see dot. Four colored rods let you change sights to fit shooting conditions. Locating fingers on each end center the sight on your rib; two strong magnets prevent movement.

SPECS: Base - Plastic, black. Rods - Polymer, red, green, yellow, orange. .170" (4.3mm) diameter sighting dot. M-300 - fits ribs 1/16" (5.5mm) to 3/16" (8.2mm) wide. M-400 - Fits ribs 1/16" (8.2mm) to 1/8" (11.3mm) wide.

#638-300-000 M-300 Fiber Optic Sight, 8C17L59 \$ 21.99

#638-400-000 M-400 Fiber Optic Sight, 8C17M59 21.99

COMP SIGHT - Light gathering, polymer rod provides an easy-to-see dot in low light and bright daylight. Steel base replaces front bead, screws on for a secure mount. Includes eight interchangeable light pipes, three orange, three green and two white in three diameters: .105", .115" and .130" for competition, law enforcement and field use. Four sight mounting screws are supplied to fit nearly all shotgun ribs, plus a rotary carrying case for storing light pipes and spring release key.

SPECS: Steel base, matte black. 1" (2.5cm) long. Screw/fits: 3-56" for Ruger, Beretta/Benelli, Browning Target Citori, Krieghoff, M3X.5" for Browning Gold and Citori Field; 5-40" for Mossberg; 6-48" for Remington (with threaded bead) and SKB sporting models.

#638-000-001 Comp Sight, 8C28G04 \$ 32.99

TOM BUSTER II SIGHT SET - Fits shotguns with vent ribs between 11/64" and 7/16" wide and a removable front sight. Rear has two green dots and adjusts for windage and elevation. Front has one green and one orange, interchangeable rod. Sights fit a variety of shotguns and kit includes five installation screws.

SPECS: Rear Sight - Steel base, black. 2 1/2" (63mm) long, 3/4" (19mm) wide, 1/8" (3.1mm) high. Front sight - 2 1/2" (63mm) long, 1/4" (6.3mm) wide, 1/4" high. Includes: 3-56; 3mm x .5; 3mm x .6; 5-40; 6-48. Gunsmith installation recommended.

#638-000-038 Tom Buster II Sight Set, 8C25A49 \$ 33.99

FLAME SIGHT - Replaces the front bead with a highly visible fiber optic rod on all shotguns with a ventilated rib. Screws are included to fit all front bead thread sizes. An easy way to upgrade to a bright front sight for hunting, target shooting, or tactical use.

SPECS: Base - steel black oxide finish. Approximately 1/2" (2.2cm) long. Fluorescent green LitePipe. Replaces front sight bead on all vent ribbed shotguns.

#638-000-040 Flame Sight, Green, 8C12B74 \$ 14.99

SPARK II SIGHT - Highly visible, fiber optic front sight features a unique, interchangeable mounting post system for easy installation on most major brands of shotguns with plain or ribbed barrels. Pre-tapped, steel sight base accepts five, included mounting posts to accommodate shotguns drilled and tapped for 6-48, 5-40 or 3-56, plus the popular 3mm x .5 or 3mm x .6 metric sizes. Bright, fiber optic LitePipe provides superior light transmission from dawn 'til dusk, perfect for low light hunting conditions, as well as competition and self defense guns where fast sight acquisition is paramount. Requires drilling and tapping on shotguns with factory, press-fit bead sights.

SPECS: Sight Base - Steel, blue finish. .204" (5.2mm) long x .137" (3.5mm) wide. Bead - Polymer, available in Red or Green. .362" (9.2mm) long x .106" (2.7mm) diameter. Sight Height - .167" (4.2mm) high from top of barrel to top of bead. 6-48 fits Remington, Weatherby, SKB and Ithaca. 3-56 fits Browning Citori target guns, Benelli, Beretta, Ruger, and Winchester. 5-40 fits Mossberg. 3mm x .5 fits Browning Gold and Citori field guns. 3mm x

SCATTERGUN TECHNOLOGIES REMINGTON TRAK-LOCK® II GHOST RING SIGHTS

Tritium Provides Excellent Sight Acquisition, Day Or Night

Self-illuminating Tritium front sight dot combined with a large, light-gathering rear ghost ring provides extremely fast sight acquisition during day or low light conditions. Rear ghost ring is available with or without tritium. Trak-Lock rear sight features a single set-screw for windage and elevation adjustments. Rugged, low-profile steel body has black parkerized finish for durability. TF12 contains tritium dot front sight with standard rear ghost ring. TF12FO contains Tritium front sight only. Fits 12 gauge.

SPECS: Steel, black parkerized. Fits plain barrel Rem. 870, 1100, 11-87, SPT-12. Adapts to fit other guns. Requires drilling and tapping of receiver; front sight epoxies over factory front. Includes rear mounting screws.

TF12 - Tritium front sight with standard rear ghost ring. Fits 12 gauge. TF12FO - Tritium front sight only. Fits 12 gauge.

MAGNI-COMP SIGHT - Innovative tunnel sight with highly visible red or green rod provides exceptional sight contrast in all light conditions. Front sight dot is only visible when using correct head alignment, forcing proper shooting form and increasing accuracy. Red or green fiber optic rods are easily interchangeable allowing you to change sight color when light conditions change. Designed to fit ventilated ribs with removable front beads. Contains a compact, stainless steel base that is secured firmly to the ventilated rib using included screw, making it ideal for heavy recoil loads or ported barrels. Sight base uses a locking spring to keep the light rod secure, yet allows easy interchangeability of the red or green rod in the field with provided key. Includes five different size sight screws for a variety of ribs.

SPECS: Base - 1704 stainless steel, matte black finish, 1 1/4" (3.1cm) long. Rods - polymer, (1) red, (1) green, 1/16" (1.78mm) long x .07" (1.8mm) dia. Includes five screw sizes: 3-56" fits Winchester, Beretta, Benelli, and Ruger shotguns; M3 x .5" fits Browning BPS, Gold and Citori Field guns; M3 x 6" fits Browning Citori Hunter; 5-40" fits Mossberg shotguns; 6-48" fits Ithaca, Remington, and SKB field models.

Quickly Turns Rib-Equipped Shotguns Into Slug Guns

Give your favorite shotgun a more accurate, rifle-style sight picture in only minutes. Clamps to vent-rib; fast to install and fast to remove. Adjusts for windage and elevation. Front sight provides a red dot that glows in all ambient light conditions. The more light, the brighter it glows; won't "wash out", even in direct sunlight. U-Notch rear blade is equipped with a bright green rod on either side of the notch for precise, low-light sight alignment.

SPECS: Machined aluminum, black, anodized, matte. Universal fit for all shotguns equipped with 1/4" (6.3mm), 3/16" (7.9mm) and 1/8" (9.5mm) wide, vent ribs. **Rear** - "U" notch fiber optic. **Front** - Fluorescent red front bead on sheared-style blade. Includes wrench and instructions.

- #962-000-014 Universal Slugger Fire Sight, 2F29A74. . . \$ 34.99

SHOTGUN FIRE SIGHTS - Models for Remington 870/1100 (pre-2003) and Winchester 1300 guns equipped with slug or turkey barrels and factory sight bases. Front sight provides a glowing red dot that's easily seen in all ambient light conditions. Fully adjustable. U-notch rear has two glowing green dots for precise sight alignment.

SPECS: Machined aluminum, black, anodized. **Rear** - "U" notch fiber optic. **Front** - Fluorescent red front bead on sheared-style blade. Includes instructions. **Remington** fits Remington shotguns with 3/16" dovetail front sight ramp.

- #962-565-300 Remington Fire Sights, 2F24A64. \$ 28.99
- #962-000-002 Winchester Fire Sights, 2F27M19 31.99

REMINGTON GHOST RING FIRE SIGHTS - Bright, high contrast fiber optic sights with large aperture, rear ghost ring provide fast, accurate sight alignment in all light conditions. The more light, the brighter the beads glow. Front sight has a single red insert, rear ghost ring has two green inserts to form an easy-to-align, 3-dot sight picture. Fits Remington shotguns with 3/16" dovetail front sight ramp.

- #962-000-083 2003 & Earlier Ghost Ring Fire Sights, 2F31N44 \$ 36.99

Gives Your Shotgun A Rifle-Style Sight Picture

Easy-to-install tactical sight set has a Picatinny-rail section with ghost ring rear sight and banded front sight. Picatinny rail is pre-drilled for factory optic mount holes. Ghost ring is adjustable for windage and elevation. Banded front sight post has a Tritium dot for visibility in all light conditions. Fits barrels less than 8.860" in diameter that do not have a front sight rib or base.

SPECS: Picatinny Rail - Aluminum, anodized, black. **Front/Rear Sights** - Stress-proof steel, black oxide finish. Fits barrels with .840" to .860" O.D.

BIG DOT TRITIUM FRONT SIGHT**

Installs Easily Over The Existing Bead Sight

High-visibility Tritium dot front sight surrounded by a large white ring helps improve target focus and low light sight acquisition and sight recovery after muzzle flash. Installs over existing front sight beads from .125" - .140" diameter by filling the cavity on the underside of the sight with Brownells Acraglas Gel, then pressing the sight over the bead and allowing it to fully cure. If existing bead is too small or too large, replace with Brownells #6 bead for 3-56 threads or #26 for 6-48 threads. Some shotgun barrels may require drilling and tapping of existing hole to 6-48 for installation of #26 Brownells bead. **Remington Pedestal** model with stepped bottom fits Remington shotgun barrels with front sight pedestal. **Vent Rib** model with flat bottom fits shotgun barrels with ventilated ribs. **Plain Barrel** model with cupped bottom fits round shotgun barrels. Includes instructions.

SPECS: Machined steel, black, matte finish. **Big Dot**. 161" (4mm) diameter. Fits beads from .125" (3.2mm) to .140" (3.5mm). **Remington Pedestal** fits Remington front sight pedestals. **Vent Rib** fits ventilated ribs. **Plain Barrel** fits round barrels. Includes instructions.

- #006-000-158 Remington Pedestal Big Dot Tritium, 6K57L59. \$ 63.99
- #006-000-159 Vent Rib Big Dot Tritium, 6K57A59. . . . 63.99
- #006-000-160 Plain Barrel Big Dot Tritium, 6K57F59. . . 63.99

TACTICAL FRONT SIGHT**

Speeds Sight Acquisition

Convert your shotgun to a tactical workhorse. Banded front sight features green Tritium dot surrounded by a white ring. Supplied shims ensure barrel band clamps snugly around muzzle. Contoured rear sight requires drilling and tapping; includes two interchangeable aperture sizes.

SPECS: Steel, black, matte finish. Tritium dot with white ring, 3/4" (19mm) high from top of barrel. Fits Rem 870, 1100, 11-87 shotguns with .860-.885" (21.8-22.5mm) muzzle diameters.

- #006-000-118 Banded Front Sight, only, 6K80F99 . . \$ 89.99
